Think Earth Think Renewables

AUTHORISED CHANNEL PARTNER OF VIKRAM SOLAR LTD

**CORPORATE
BROCHURE**

- ◆ Solar Modules & Inverters
- ◆ Module Mounting Structures
- ◆ Turnkey EPC
- ◆ Operation & Maintenance

ABOUT US

We began our operation with the aim to deliver energy efficient Solutions to Industrial and Corporate clients to achieve optimized energy usage and realize cost savings. As a part of the energy efficiency package, solar power plants are also an integral part of the solution design. Apart from consulting and implementation, we have also developed solar components such as aluminum and GI structures to facilitate.

We are present across the value chain from the design of solar power plant, component manufacturing, and supply, installation, commissioning, Liaison with govt. agencies to avail all statutory approvals and benefits, operation and maintenance.

We have started to offer standalone solar asset management services including preventive maintenance of plants, solar panel cleaning services, annual maintenance contracts, periodic maintenance packages for solar plants ranging from small commercial roof-top systems to MW scale ground-mounted solar plants.

- * Best Quality

- * Transparent Selection of Components

- * Extended Maintenance Support

- * In-house Design and implementation

- * End -to -End implementation including all statutory approvals

OUR SOLUTIONS

Residential Solar

Our solutions for residential rooftop projects are complete up to net metering assistance. Hundreds of commissioned projects satisfied customers are a testimony to our success.

Having your own solar power plant on the roof-top provides you the independence and the reliability to generate and utilize your own power. In this way, you will also contribute to reducing the carbon footprint of the world which is clearly the need of the hour!. We provide complete solutions from site assessment to commissioning of the solar power plant including the necessary approvals to be sought from the authorities. Along with the installation, We provide After Sales Maintenance Support for the lifetime of the solar plant along with a data monitoring system to keep track of the solar power generation daily, through an app based on the smart phone.

Industrial & Commercial

We are market leaders in Rooftop EPC with proven expertise of designing and commissioning rooftop solar projects for residential, commercial institutional or industrial use.

Vision

To provide Clean, Green, & Affordable energy Solutions to India.

We Currently has a team strength of over 50 members which inclusive design, installation and field maintenance team. We also have 2 teams of technicians readily available for installation and service calls.

Now avail Your Residential Solar Power with Easy EMI/ LOAN facilities

- ◆ EMI tenure varies from 9 to 18 months*
- ◆ Monthly EMI starts from ₹ 7511 for a 2KW system*
